significance in revealing the secrets of the Creation and to improve the people’s economic life.

The table of chemical elements officially taught at schools and universities is a Mendeleev-forged version. Mendeleev, in a work entitled “An Attempt at a Chemical Conception of Universal Ether“, provided a slightly different table (Polytechnic Museum, Moscow).

Подлинная, нефальсифицированная Таблица Д.И. Менделеева  
«Периодическая система элементов по группам и рядам»  
(Д. И. Менделеев. Основы химии. VIII издание, СПб., 1906 г.)

Группы элементов										
Ряды	0	I	II	III	IV	V	VI	VII	VIII	
0	Негелий									
1	Короний H 1,008									
2	Гелий He 4,0	Литий Li 7,03	Бериллий Be 9,1	Вор B 11,0	Углерод C 12,0	Азот N 14,01	Кислород O 16,00	Фтор F 19,0		
3	Неон Ne 19,9	Натрий Na 23,05	Магний Mg 24,36	Алюминий Al 27,1	Кремний Si 28,2	Фосфор P 31,0	Сера S 32,06	Хлор Cl 35,45		
4	Аргон Ar 38	Калий K 39,15	Кальций Ca 40,1	Скандий Sc 44,1	Титан Ti 48,1	Ванадий V 51,2	Хром Cr 52,1	Марганец Mn 55,1	Железо Fe 55,9	Кобальт Co 59
5		Медь Cu 63,6	Цинк Zn 65,4	Галлий Ga 70,0	Германий Ge 72,5	Мышьяк As 75	Селен Se 79,2	Бром Br 79,95		
6	Криптон Kr 81,8	Рубидий Rb 85,5	Стронций Sr 87,6	Иттрий Y 89,0	Церкий Zr 90,6	Нисбий Nb 94,0	Молибден Mo 96,0		Рутений Ru 101,7	Родий Rh 103,0
7		Серебро Ag 107,93	Кадмий Cd 112,4	Индий In 115,0	Олово Sn 119,0	Сурьма Sb 120,2	Теллур Te 127	Иод I 127		
8	Ксенон Xe 128	Цезий Cs 132,9	Барий Ba 137,4	Лантан La 138,9	Церий Ce 140,2					
9										
10				Иттербий Yb 173		Тантал Ta 183	Вольфрам W 184		Осний Os 191	Иридий Ir 193
11										Платина Pt 194,8
12			Радий Ra 225		Торий Th 232,5		Уран U 238,5			

The last time, in an undistorted form, the real Mendeleev Table was published in 1906 in St. Petersburg (textbook “Fundamentals of Chemistry”, VIII edition). The differences are visible: the zero group is moved to the 8th, and the element is lighter than hydrogen, with which the table should begin and which

is conventionally called Newtonium (ether), is generally excluded.

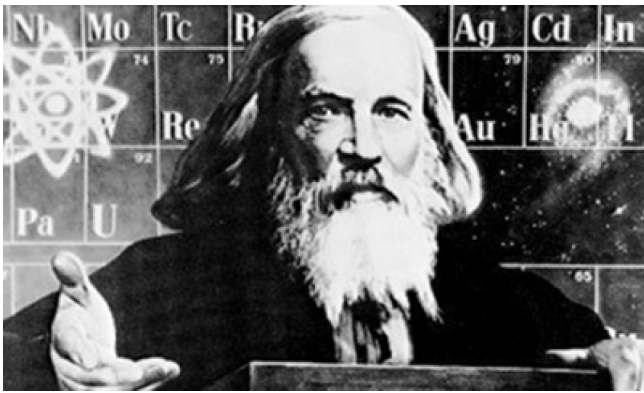

*"An Attempt at a Chemical Conception of Universal Ether"* (Polytechnical Museum, Moscow)

Mendeleev was the organizer and the permanent leader (1869-1905) of a Russian public scientific association called the Russian Chemical Society (since 1872 – the Russian Physical and Chemical Society), which published throughout its existence the world-famous journal of the RFLF, until the liquidation by the Academy of Sciences of the USSR in 1930 – of both the Society and its journal.

But few know that Mendeleev was one of the last world-famous Russian scientists of the late 19th century who defended the idea of ether as a global substantial entity in world science, who gave it fundamental scientific and applied importance in revealing the secrets of Being and for improving the people's economic life.

Even fewer are those who know that after the sudden (!!?) death of Mendeleev (01/27/1907), he was then recognized as an outstanding scientist by all scientific communities around the world **except the St. Petersburg Academy of Sciences**. His main discovery – the “Periodic Law” – was deliberately and universally falsified by the world academic science.

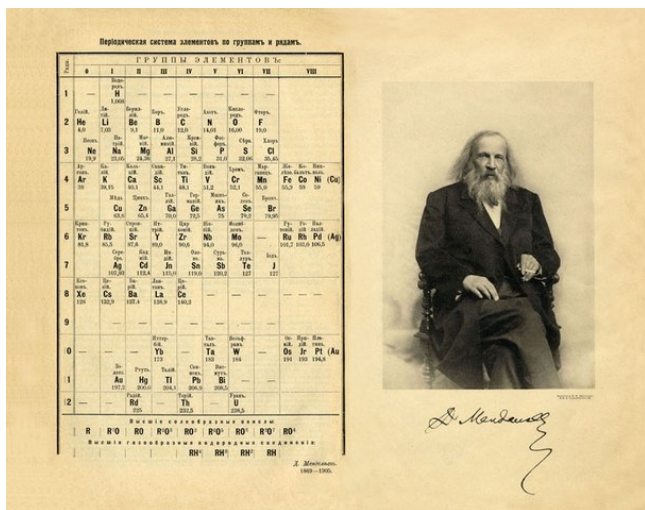

There are also very few who know that all of the above is tied together by the thread of sacrificial service of the best representatives and bearers of the immortal Russian Physical Thought for the benefit of people, public good, in spite of the growing wave of irresponsibility in the upper layers of society of that time.

**The great alchemist, Mendeleev, revealed in his table the secret of the Creation of the physical world from ... ether.**

At First it was Ether. It is from ether that the substance of the material world appears, which is divided into four elements (fire, air, earth, water) – and again through radioactive substances at the end of the table they turn back into ether ... All this can be traced in Mendeleev’s table.

**“ The gravity problem and the tasks of the entire energy sector cannot be imagined to be really solved without a real understanding of the ether as a global medium that transfers energy over distances . A real understanding of the ether cannot be achieved by ignoring its chemistry and not considering it an elementary substance”**

Modern material science has limited itself to the framework of the matter, and therefore is not capable of explaining what goes beyond this framework. The end of the 19th century was the dawn of a “different” science, but the puppeteers led mankind to a materialistic impasse and the discoveries of Mendeleev, Tesla and other ascetics were nothing to them.

**In this article:** ether, featured, periodic table
